

## CarrickFergus in bloom By Laura wright

Crystal blue waves crashing against the shore

All different shapes and sizes red, blue and more

Rich red roses blooming all around

Roses, tulips and violets are all easily found

Ivy winding all-around of house walls and castles

Colours and sun burning bright, colours bold, metallic  
and pastels

Kites all colourful blowing in the soft wind as if it could  
just blow away

Feeling happy, like sunshine even if it's a rainy day

Every flower is unique, in its own special way

Ripe red apples good enough to eat, where you'll see  
wasp and bees that are also keen!

Green grass rustling in the wind emerald and  
evergreen

Up in the sky rainbows shoot out their colours

Seeing people with butter cups, red roses and flowers

If you look inside a flower bed you will see brightly  
coloured flower heads popping out

Nettles which sting get squashed whilst kids run and  
shout

Bumble bees passing from flower to flower

Laughter, happiness and smiles all the hour

On-going fun which never ends but is spread

Orange, pink or white, roses don't have to be red

Memory's shared in carrickfergus and bloom.
